HPP Cold Pressed

Dr. Blend's juices and cures are produced using the latest cold-pressing process (HPP) technology. Through this process, we can extract more nutritional values, minerals and vitamins from fruits and vegetables. Because we make the most of the benefits of fruits and vegetables, less waste is produced.

The peculiarity of this technology is that the shelf life of the juices produced is considerably longer. The shelf life of most juices produced without preservatives is up to 2 or 3 days. The juices of Dr. Blend can be kept for between 10 to 15 days.

Our juices are 100% pure juice, 100% fresh and are made without preservatives or additives.

Discover our juices

Dr. Blend makes premium juices that have a place in your fridge every day.

Fresh fruit or vegetable juice at any time. We can provide you with healthy juices and convenience now and in your future.

Plus all our juices are now available separately!
